Re: FESHM 4195 – Special Toxic Hazards - Silica
FESHM 5031.1 – Piping Systems
FESHM 8043 – Toxic Release Inventory (TRI) Reporting Program

These three chapters were updated by Subject Matter Experts to align the requirements with recent changes in applicable regulations. 5031.1 went out for labwide review and minor comments were received and addressed. 4195 and 8043 had very minor updates. Changes are summarized below.

4195 –

- Added a line for concrete coring to the chart in the Technical Appendix.

8043 –

- Changed title of link within document.
- Modified responsibilities of Chief Safety Officer.
- Added responsibilities of HCTT.

5031.1 -

- Added requirements for purchased unlisted components and piping systems.

These chapters do not need to go to the Directorate for review and approval.
